ABOUT ME

Designer & Front-End Developer with a strong foundation in Graphic Design, UI/UX Design, and web development. Skilled in design principles, typography, color theory, visual hierarchy, branding, and responsive interface design. Completed internships at Ofish Studio (Graphic Design) and CodeAlpha (Front-End Development & Data Science). Passionate about creating visually appealing and user-centered digital experiences that combine creativity with functionality.

EDUCATION

SILVER OAK UNIVERSITY

B.TECH(COMPUTER SCIENCE & ENGINEERING) CGPA : 8.67/10

2023-2027

RAJASTHAN HINDI HIGH SCHOOL

CLASS XII(GSEB) - 71.23%

2023

SKILL

- **Frontend Development** - HTML, CSS, JavaScript, React.js, Responsive Design, Tailwind CSS
- **Backend Basics** - Node.js, Express.js, REST APIs, MySQL / MongoDB
- **Data Science & ML** - Python, Pandas, NumPy, Matplotlib, Scikit-learn, Machine Learning Basics
- **Design & UI/UX** - Figma, UI/UX Design, Wireframing, Landing Page Design, Adobe Photoshop, Illustrator, XD, Indesign
- **Tools & Platforms** - Git, GitHub, VS Code, Jupyter Notebook, Zoom API (if used in Well Being Hub)

WORK EXPERIENCE

Frontend Development Intern — CodeAlpha

July 2025 – August 2025

- Built responsive web apps using HTML5, CSS3, and JavaScript (ES6+) with Flexbox, Grid, and media queries for cross-device compatibility
- Developed Portfolio Website, Product Landing Page, and Calculator — deployed live on GitHub Pages
- Applied DOM manipulation, event handling, and form validation; debugged using Chrome DevTools

Graphic Design Intern — Ofish Studio (Remote)

April 2026 – June 2026

- Designed social media creatives, marketing materials, and brand assets for client projects.
- Applied design principles, typography, color theory, and visual hierarchy to create engaging visuals.
- Collaborated with the team to develop brand-consistent designs across digital platforms.
- Assisted in UI design and landing page design projects, focusing on user experience and visual consistency.

PROJECT

Digital Queue Management System | HTML, CSS, JavaScript, Node.js, MySQL, Python Team Leader

Semester VI

- Developed a web-based clinic queue system with real-time token generation, appointment booking, and live queue status updates
- Built separate dashboards for Patient, Receptionist, and Doctor roles with role-based access control
- Trained an ML model on historical patient data to predict wait times and send proactive notifications to patients before their turn — reducing uncertainty and improving experience

WellBeing Hub | HTML, CSS, JavaScript, Node.js, Express.js, MongoDB Team Leader |

Semester III

- Led a 5-member team to build a full-stack wellness platform featuring therapy session booking, audiobook library, online classes, and a real-time progress tracker
- Built RESTful APIs with Node.js/Express, integrated third-party payment and scheduling APIs, and used MongoDB for dynamic data management
